The consolidated activity in the brand "Karrige Pogradeci" has a vertical integration of several processes in support of recreational services (HoReCa), with special focus on the tourism sector. The company already offers a wide range of products, starting the massive and growing demands of large operators, but also the creation of a unique product with a unique design for demanding customers.

This vertical integration, the dedicated focus, and the ability to adapt to most demanding clients, is a differentiating element of "Karrige Pogradeci" in the regional market. As a result, thanks to investments in technology, the previous market focused on Albania, has now expanded and consolidated in neighboring markets such as Kosovo, Macedonia, Greece and Montenegro, as well as in wider markets such as Switzerland, Germany, England, etc. Over 30% of sales and services are already dedicated to exports.

The priority is always the clients and their desires to produce models tailored to them and the architects. Our models are unique, 100% Albanian production, with guaranteed quality, comfortable and in line with the latest trends. Bringing to the market since 2015 of elite products imported from different countries of the world in our showrooms creates opportunities for customers to identify their real needs, as well as enable the company to capitalize on the latest knowledge and trends in the global market.

It all starts with identifying customer needs and further support during the design and production or finding additional elements in international markets until their assembly/ installation in customer premises.
